

CIVIC INTELLIGENCE REPORT

Village Performance Assessment • Generated: 2026-06-17 11:49

Village Performance Snapshot

Total Complaints	Pending Issues	Resolved Issues	Resolution Rate
7	6	1	14.3%
Avg Resolution Time	Village Health Score	Highest Risk Area	Most Common Issue
102.0 hrs	81/100	Ward 3	Drainage Overflow

Civic Health Status

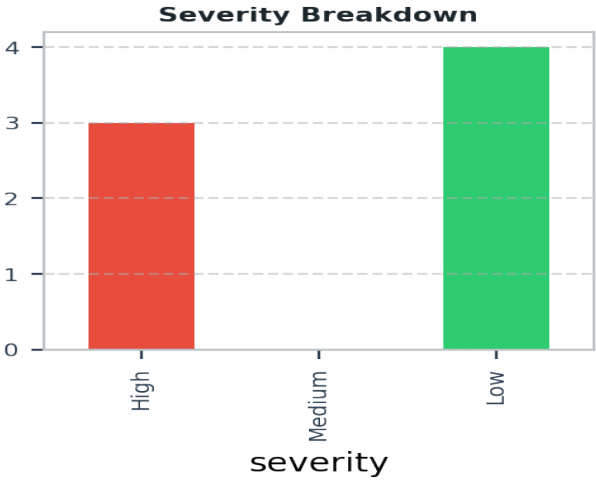

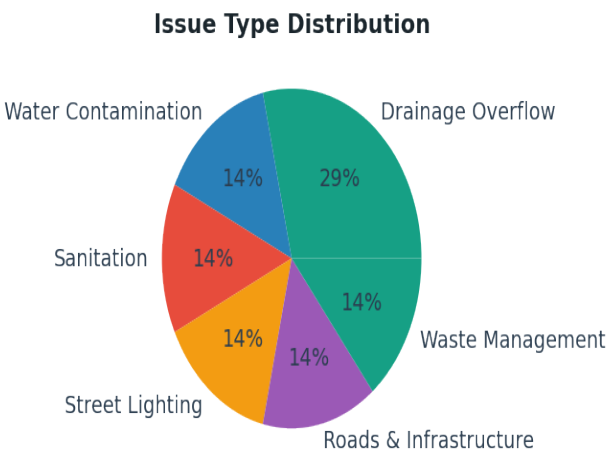

STATUS: MODERATE RISK

Reason: The overall civic condition is graded as MODERATE RISK with a health rating of 81/100. Issues are primarily concentrated in Ward 3 where critical levels of unresolved 'Drainage Overflow' complaints require urgent administrative inspection.

Area Risk Ranking

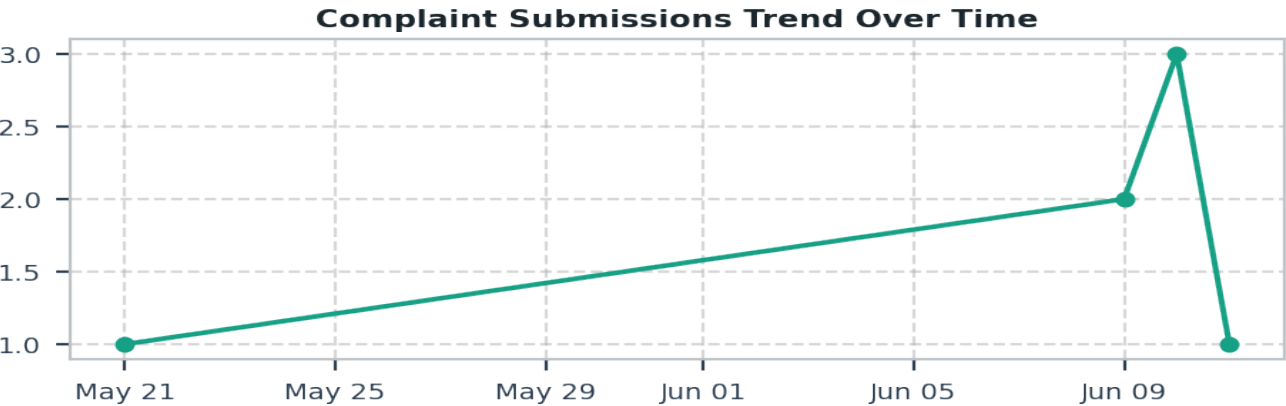

Rank	Location / Ward	Health Score	Risk Level	Active complaints
1	Ward 3	70/100	Moderate	2
2	Near 2 Town Police Sation, 3Rd Mile	70/100	Moderate	2
3	Ward 2	80/100	Moderate	1
4	Weavers Colony Nellore	90/100	Healthy	1
5	Ward 5	95/100	Healthy	0

Advanced Analytics

Data Interpretation: Issue distribution profiling reveals that **Drainage Overflow** represents the largest volume, accounting for **29%** of total reported issues. Operational severity analysis indicates that **43%** of complaints correspond to High-priority risks, mandating accelerated dispatch protocols.

Complaint Trend Analysis

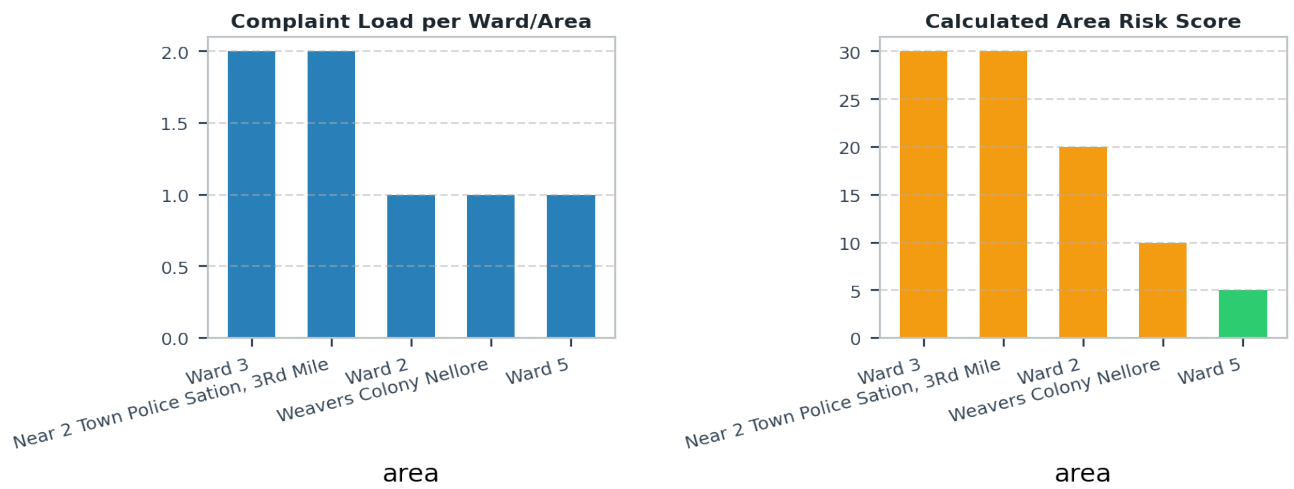

Historical data indicates that the complaint volume trend is currently **INCREASING**. A rising intake velocity points to deteriorating conditions or heightened public compliance reporting.

Area-Wise Performance Analysis

Area / Ward	Total	Resolved	Pending	Health Score	Risk Level
Ward 2	1	0	1	80/100	Moderate
Ward 3	2	0	2	70/100	Moderate
Weavers Colony Nellore	1	0	1	90/100	Healthy
Near 2 Town Police Sation, 3Rd Mile	2	0	2	70/100	Moderate
Ward 5	1	1	0	95/100	Healthy

Hotspot Intelligence & Root Cause Analysis

High-Risk Zone Detection

Rank 1: Ward 3	Risk Score: 30/100
Health Rating: 70/100 (Moderate)	Primary Issue: Drainage Overflow
Recommended Action: Dispatch clearing crews to remove blockages and repair channels.	

Rank 2: Near 2 Town Police Sation, 3Rd Mile	Risk Score: 30/100
Health Rating: 70/100 (Moderate)	Primary Issue: Drainage Overflow
Recommended Action: Dispatch clearing crews to remove blockages and repair channels.	

Rank 3: Ward 2	Risk Score: 20/100
Health Rating: 80/100 (Moderate)	Primary Issue: Water Contamination
Recommended Action: Conduct immediate pipeline inspection and water safety testing.	

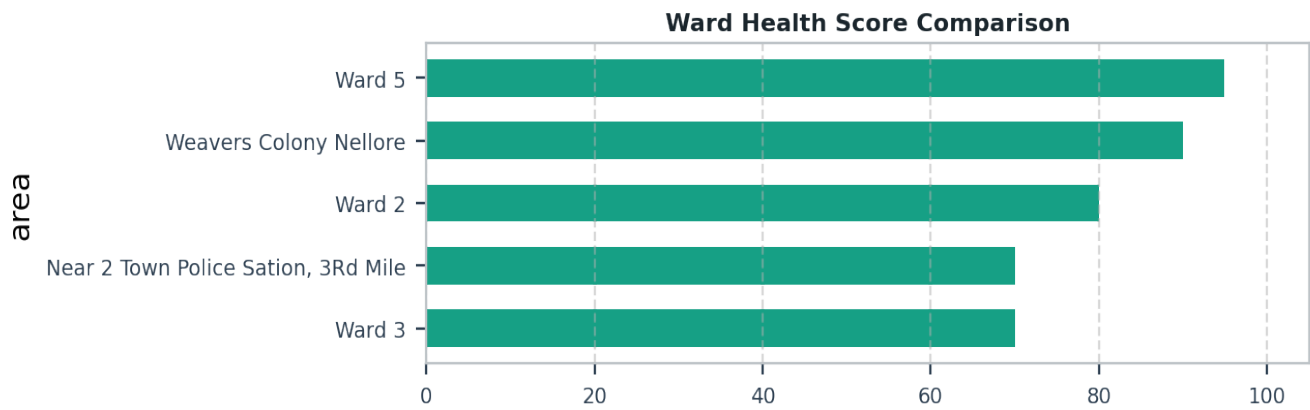

Root Cause Analysis

- Water safety anomalies in **Ward 2** indicate potential structural pipeline leakage or sewage intrusion.
- Drainage backups in **Near 2 Town Police Sation, 3Rd Mile** are primarily driven by siltation and solid waste clogging outflow conduits.
- Sanitation load in **Near 2 Town Police Sation, 3Rd Mile** highlights insufficient collection frequencies and poor bin placement density.
- Public hygiene concerns in **Weavers Colony Nellore** are exacerbated by open drains and delayed public cleaning schedules.

Civic Impact Assessment

Civic Dimension	Calculated Impact Score	Threat Assessment
Public Health	70/100	Severe
Sanitation & Waste	60/100	Moderate
Water Safety	35/100	Moderate
Environmental Risk	45/100	Moderate

Smart Recommendation Engine

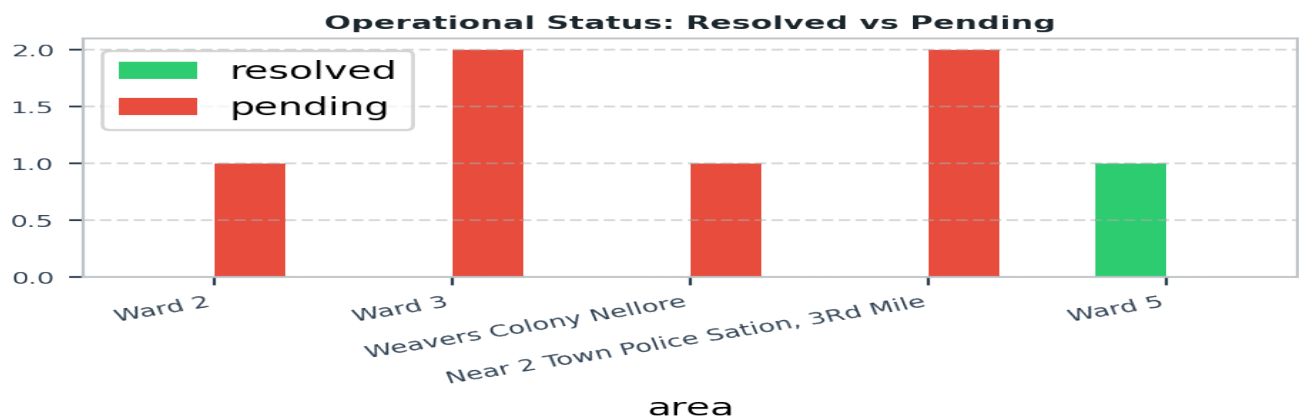

Data-Driven Action Guidelines

- Water Supply Network:** Launch bacteriological water quality testing across Wards immediately. Inspect pipelines for physical cross-connections near drainage conduits.
- Drainage Infrastructure:** Schedule high-pressure jetting services for blocked mains. Reinforce open channels with concrete lining before seasonal rainfalls.
- Solid Waste Operations:** Deploy extra covered wheelbarrows and bins. Revise collection frequencies to a daily routing schedule in dense areas.
- Sanitation Services:** Conduct bleaching powder spraying and mosquito larvicide treatments in stagnant pool areas.

Priority Action Matrix

Priority Horizon	Recommended Action Items	Target Location
Priority 1 (Immediate, 24-48h)	Address 'Water Contamination' at Ward 2 Address 'Drainage Overflow' at Ward 3	Ward 2, Ward 3
Priority 2 (Short-term, 7-14d)	Clear surface sludge and spray larvicide	All Areas
Priority 3 (Long-term, 30-90d)	Piped network separation & drainage upgrading projects	Village Wide

Authority Action & Operational Report

Resource Allocation Suggestions

Operational Squad	Suggested Deployment Force	Operational Frequency
Sanitation Taskforce	Deploy 1 field cleaning unit(s) with protective gear	Daily routing / target clearing
Water Quality Inspectors	Assign 1 inspector(s) with testing apparatus	Bi-weekly sampling / emergency response
Infrastructure Maintenance Crew	Contract 1 engineering team with heavy equipment	As-needed for pipeline repairs

Resolution Performance Metrics

Metric Indicator	Calculated Score	Target Benchmarks
Resolution Rate	14.3%	Minimum 90% compliance
Backlog Rate (Pending)	85.7%	Target under 10%
Average Resolution Time	102.0 hrs	Target under 48 Hours
Operational Efficiency Index	20.2 / 100	Minimum 80.0 score

Executive Summary: Current analytical indices indicate that **Ward 3** requires prioritized sanitation and infrastructure intervention due to repeated Drainage Overflow complaints. Operational resolution rates stand at 14.3%, which requires strengthening to meet targeted safety and sanitation standards. Public health protection remains the highest immediate objective.
